Become a Therapeutic Pain Specialist with ISPI

Program Description

Persistent pain affects the lives of 100 million people in the U.S., according to the current data. The evidence for therapeutic approaches in treating these patients is ever-increasing. TPS teaches and integrates an interdisciplinary approach to acute and chronic pain with an intent to positively impact human suffering. This program is designed so you will:

- Become a certified, highly skilled practitioner with advanced clinical competency in evaluation and treatment of pain.
- Make evidence-based practice an immediate reality in your clinical practice.
- Improve your knowledge of current evidence related to pain neuroscience.

“ I’m so excited that I went through this certification! I was ready to quit my 10-year career as a PTA because I was frustrated and felt I had inadequate knowledge and tools to help persistent pain patients. Since going through the TPS Program, I have not enjoyed treating persistent pain as much as I do now! I feel that I can actually help these tossed aside individuals and help them to help themselves. ”

—Jessica M., TPS Graduate

Tuition: \$4,800

Curriculum: approximately 5 months online + two 2-day on-site weekend intensives

Audience: Licensed healthcare providers including physical therapists, physical therapist assistants, occupational therapists, medical doctors, nurses, and more

Next Application Deadline: June 1

Fellowship in Pain Sciences

ISPI is proud to announce that our first cohort of Fellowship in Pain Sciences students will begin courses this summer! This program is designed for clinicians who want to advance their knowledge in pain sciences to a mastery level. These students will learn about the clinical application of pain science including assessment and treatment, advanced clinical reasoning in a biopsychosocial model, as well as multidisciplinary care for pain.

CONFERENCE 2018

Thank you to everyone who made Align Conference 2018 such a success!

AT THIS YEAR'S CONFERENCE, WE HAD:

- 395 attendees
- 47 states & provinces represented
- 6 countries represented (with the furthest attendee traveling from Australia)
- 21 speakers
- 22 presentations given
- 6,512 CEUs earned overall

Follow along on social media for announcements about Align Conference 2019!

Blog Highlights

Space. Movement. Blood.

by Brian Freund

"I can remember the day that I graduated from physical therapy school 20 years ago. I was clear in my goals for my career. I wanted to become an orthopaedic manual therapist."

Upcoming ISPI Webinar

Biopsychosocial Manual Therapy - The Brain has a Body

Modern pain science has questioned the use and importance of manual therapy. Is manual therapy a fad that's lost its touch? Join Dr. Adriaan Louw as he discusses the powerful interplay between neurophysiological effects, placebo, therapeutic alliance and patient expectations when it comes to treating people with spinal pain.

Date: July 11, 2018

Time: 8:00pm ET
